**Fullstack developer with
experience in UI Developer**

“ With over 6 years of professional experience as UI & Front Developer, I have solid skills in HTML5 markup, CSS3, responsive web & semantic web analysis. In my last position I covered processes of front-end with Javascript using React and back-end in Node JS, focused on REST API with Express and MongoDB. ”

You will find me to be a curious, analytical problem solver with a focus on continuous learning and keeping up-to-date on new technologies. ”

Experience

February 2019
Ongoing
